

# Among Asia's Highest-Head Hydropower Projects

Makari Gad stands out as one of the highest-head hydropower plants in the region – engineered under some of the most challenging terrain and conditions.

## Harnessing Nature's Power for a Sustainable Future

Makari Gad Hydro Power Plant, a visionary initiative that taps into the energy of flowing water to create a cleaner, greener future. Explore the marvels of renewable energy and discover how we're investing in innovation to power generations to come.

10 MW

Plant Capacity

2,767 Mn NRs

Project Value

3+

Years of Experience

### Quality, Environment, Health and Safety

We are committed to continuous improvement of Quality, Environment, Health and Safety performance of its operations by benchmarking with best-in-class standards. We stay focused on attaining and maintaining the highest standards of Quality, Environment, Health and Safety in selection, design, procurement, construction, operation and maintenance of assets across their life cycle.

## Our Environmental Harmony

#### Local Employment

Our commitment to the community reflects in 100% local staff members working in operations and over 200 people employed during the construction phase starting from 2020 to Early 2023.

#### Regional Development

Royalties from energy and capacity support the development of the region. We've provided infrastructure, education, health campaigns, and vital facilities to Apihimai Rural Municipality.

#### Empowerment Through Education

Skill enhancement, vocational education, and income-generating training opportunities empower stakeholders for a brighter future.

#### Environmental Sustainability

Makari Gad hydro power plant started the forest conservation program by cultivating 25,000 trees in the local area.

# About Us

## Empowering Futures Through Sustainable Energy

 Makari Gad Hydropower (Pvt) Ltd. is backed by LTL Energy (Pvt) Ltd., a Sri Lankan private limited company jointly owned by LTL Holdings (55%) and LVL Energy Fund (45%).

We are driven by a clear purpose: to deliver reliable renewable energy while respecting the environment and the communities we work with. Sustainability and responsible development are central to every decision we make.

## Our Vision – To be a benchmark in sustainable hydropower— delivering clean energy that powers progress while protecting nature and empowering communities

### Where We Are

 LTL Energy (Pvt) Ltd. is headquartered in Sri Lanka, while the Makari Gad Hydropower Project is located in Nepal.

The project sits in Makarigad village, Apihimal Rural Municipality (Ward No. 5), within the Darchula District of Sudurpaschim Province. Approximately 960 km northwest of Kathmandu, the site is accessible by road and strategically positioned for long-term operations.

This high-head, run-of-the-river hydropower project harnesses the natural flow of the Makari Gad stream, a key tributary of the Chameliya River in the Mahakali River basin. The result is clean energy generation that works with nature—not against it.

### Our Gallery

## Plant Operations & Power Transmission

Water is diverted from the Makari River at an intake located about 900 m above the powerhouse, then passes through desilting and forebay tanks before entering the 3.5 km penstock that drives the turbines.

Electricity generated at the powerhouse is transmitted via a 27 km, 32 kV line to the Balanch Substation, where it is connected to the Nepal National Grid through a 132 kV transmission line.

## Plant Technical Details

-  Energy Generations
  - 882 m
- Design Flow
  - 1.35 m³/2
- Catchment Area
  - 37.8 Km²
- Turbine Capacity
  - 5 MW each (x2)
- Turbine Type/Model
  - Pelton
- Installed Capacity
  - 10 MW
- Plant Factor
  - 79%
- Energy Generation
  - 69.76 GWh/Year
- Electrical Grid Connection
  - 132 kV/50Hz
- Electromechanical Equipment Supplier
  - WKV Hydro - Germany

## Advanced Turbine Technology

German-engineered Pelton turbines designed for high-head, low-flow conditions, delivering efficient energy conversion in harmony with nature.

## Optimised for Performance

A streamlined design with fewer components ensures high efficiency, low maintenance, and reduced downtime.

## High Plant Factor

Operating at a plant factor of nearly 80%, the facility delivers consistent and reliable power.

## Automated & Remotely Monitored

Fully automated systems with remote monitoring ensure safe, responsive, and reliable operations.

## **Dammika Nanayakkara**

**Director**

Dammika joined LTLH soon after graduation from the University of Moratuwa in 1995. Prior to his current role, he has been in varying capacities in the Group, such as Design Engineer, Engineering Manager and Chief Technology Officer. During this period, he has been responsible for overall engineering and technology development of the Group and its products. This includes designing and manufacturing of transformers, designing and development of thermal power plants, wind and hydro power plants, high voltage grid substations etc. He has vast experience in design, engineering, procurement, logistics and construction (EPC) of thermal power plants, grid substations, wind, hydro and solar power plants. He was instrumental in introducing energy saving projects to Industries, developing an improved and effective lightning protection system for distribution transformers as well as developing self-protected transformers.

Dammika was the Chief Project Manager of the Yugadhanavi 300 MW, Combined Cycle Power Plant project at Kerawalapitiya, which was built at a cost of over USD 300M, and the Project Director for all the power plant projects of the Group in overseas with over cumulative capacity of 900MW. Design, engineering, procurement, construction of those power plant projects worth over USD 1.2 billion were completed under the direct purview of Dammika. He played a vital role in positioning LTLH as a leading power plant development company in the region. Currently, Dammika bears the overall responsibility of heading the engineering and construction of the Sobadhanavi 350MW LNG Power Plant in Kerawalapitiya. He has served as a visiting lecturer in University of Moratuwa too. With electrical engineering industry experience of three decades and overall development experience of over 1500 mega watt of power plant capacity, Dammika is one of the most experienced power plant engineering professionals in South Asia.

Dammika holds a BSc.Eng (Hons) Degree in Electrical Engineering with First- Class Honours from University of Moratuwa. He has obtained a MEng degree from the same university. Dammika was the captain of the basketball team at the University of Moratuwa in 1994 and received university colours for four years.

Dammika is a Chartered Electrical Engineer (CEng) as well as a Chartered Professional Engineer (CPEng) registered with the Engineering Councils of Sri Lanka, UK, and Australia. He is a Fellow of the Institution of Engineers of Sri Lanka, a Fellow of the Institution of Engineering and Technology (UK), a Senior Member of the Institute of Electrical and Electronic Engineers (USA), and a Member of the Institution of Engineers, Australia.

## Utumange Gamini Sarath

Director

Mr. U G Sarath has been a Director of Lakdhanavi Limited since 1997 and has taken on an executive role as an employee of LTLH Group from 2013 onwards. Mr. Sarath with his 40 years of experience in Banking and Finance now acts as the Deputy Chief Executive Officer – Finance of LTLH.

Mr. Sarath was a career banker prior to joining LTLH. He started his career at the Central Bank of Sri Lanka and thereafter moved into investment banking. He worked at several Investment banking institutions in Sri Lanka where he structured large project finance transactions and capital market transactions. He served as the Director General/CEO of the Institute of Bankers of Sri Lanka (IBSL).

Mr. Sarath has a B.Sc. (Business Administration) degree from the Vidyodaya Campus of University of Ceylon, Post Graduate Diploma in Economic Development and MA in Economics from the University of Colombo Master of Business Administration (MBA) from the University of Sri Jayewardenepura and Statistical Training Diploma from International Statistical Training Centre (ISEC) of Indian Statistical Institute, Kolkata, India.

## **Palitha Indigahawela Gamage Janaka**

**Director**

Mr. Palitha Gamage is a seasoned professional with over 30 years of experience in banking and finance. He previously served as the CEO and General Manager of HDFC Bank of Sri Lanka (2018–2023). He is currently the Chief Executive Officer of LVL Energy Fund PLC and its parent company, Lanka Ventures PLC. Prior to joining Lanka Ventures Group, he held several senior roles at DFCC Bank, including positions in Risk Management, Corporate Banking, SME Banking, Investment Banking, and Planning. He also served as Head of Corporate Credit at DFCC Vardhana Bank.

Mr. Gamage began his career as a Civil Engineer at the State Engineering Corporation of Sri Lanka. He has also served on the Governing Board of the National Institute of Business Management and as a Non-Executive Director of National Asset Management Ltd. He holds a B.Sc. (Engineering) (Hons) from the University of Moratuwa and an MBA from the Asian Institute of Technology, Thailand. He is a Passed Finalist of CIMA (UK) and a Corporate Member of the Institution of Engineers, Sri Lanka.

## Sameera Ganegoda

Director

Mr. Sameera Ganegoda is a Chartered Electrical Engineer with a B.Sc. (Hons) in Electrical Engineering. He has significant experience in renewable energy and currently serves as Vice President – Renewable Energy (CAES – Compressed Air Energy Storage) at LTL Holdings. He has also held the position of CEO of Ceylex Renewables, a subsidiary of LTL Holdings.

## **Muthukuda Arachchige Thanuja Jayawardana**

## **Muthukuda Arachchige Thanuja Jayawardana**

Director

Thanuja joined the LTLH Group in March 2022 as Vice President Strategy & Investor Relations to oversee the raising of capital through various forms and structures and future investments of the Group. Currently she is serving as a Senior Vice President of the company.

Before joining LTLH Group, she worked at NDB Investment Bank Limited. She has over 12 years of experience in Corporate Finance having been involved in numerous capital market related transactions.

Thanuja is a Graduate of the University of Sri Jayewardenepura, having a BSc Finance (Special) Degree with First Class Honours.

Thanuja is a CFA Charter holder and a Member of CIMA CGMA

**Karan Chand**

CEO

**Karan Chand**

CEO

Karan joined Makarigad Hydropower Company Limited as Deputy CEO in 2018 and currently serves as its CEO 

Before joining Makarigad, he has worked in several organizations in different capacities as Mortgage Specialist, Wells Fargo Financial, Des Moines IA USA (2008–2009), Managing Director, Kanchan Urja (Private) Limited. (1MW Limited Power Plant from 2012 to 2014) in Nepal, Managing Director, Jal Urja (Private) Limited (2MW power plant from 2014 – 2017) in Nepal. With over 13 years of experience in the renewable energy industry, he has deep understanding of the industry, and has also gained extensive knowledge in the banking sector and sustainability growth.

Karan holds a Bachelor of Science Degree in Business Administration (BSBA) International Business from Drake University (Des Moines, IA, USA), He is a member of the Executive Committee, Independent Power Producers Association (Far West Region).
